**Table 1 Overview of activity**

Age of patient (years)	Number of patients on transplant list (daily average)	Percentage <sup>1</sup> of patients <sup>2</sup> receiving kidney only transplant within 1 year of listing	Number of transplants carried out (annual average)				Number of kidneys <sup>3</sup> retrieved (annual average)	
			All transplants	Kidney only transplants from:				multi-organ transplants that include a kidney
				DBD donors	DCD donors	Live donors		
≥18	246	21	174	34	70	45	25	183

<sup>1</sup> As a percentage of the number of patients newly listed on the deceased donor transplant list between 2007 and 2009

<sup>2</sup> Exclusions - patients who recieved live donor transplants (as centre practices with regards to listing of such patients differ) and patients registered for kidney/pancreas transplant

<sup>3</sup> Kidneys donated by adult or paediatric deceased or live donors

<sup>1</sup> As a percentage of all transplants at the centre in adult or paediatric patients using kidneys from live or deceased donors

<sup>2</sup> See Table 4 for number of transplants in paediatric and adult patients
