

St George's Hospital, London**
 Overview of activity, 2005 - 2007

Table 1: Overview of activity

Age of patient (years)	Number of patients on transplant list (daily average)	Percentage ¹ of patients ² receiving kidney only transplant within 1 year of listing	Number of transplants carried out (annual average)				Number ³ of kidneys ⁴ retrieved by alliance (annual average)	
			All transplants	Kidney only transplants from:				Multi-organ transplants that include a kidney
				Heartbeating donors	Non-heartbeating donors	Live donors		
≥18	297	28	84	40	10	34	0	248

¹ As a percentage of the number of patients newly listed on the deceased donor transplant list between 2003 and 2005
² Exclusions - patients who received live donor transplants (as centre practices with regards to listing of such patients differ) and patients registered for kidney/pancreas transplant
³ Total of kidneys retrieved by centres in the South Thames alliance
⁴ Kidneys donated by adult or paediatric deceased or live donors

**Patients listed at St Helier Hospital in Carshalton and The Royal Sussex County Hospital in Brighton have their transplants done by St George's Hospital. Data for these two centres are included throughout this report.

St George's Hospital, London
Details of activity, 2005 - 2007

Table 2: Donors (Note: Deceased donor numbers are totals for all centres in the South Thames alliance)

Deceased donors (annual average)			Live donors (annual average)	
Heartbeating	Non-heartbeating		Number	% of transplants in which kidneys from live donors were used ^{2,3}
Number	Number	% of transplants in which kidneys from non-heartbeating donors were used ^{1,2}		
63	11	10	34	15

¹All non-heartbeating donor kidneys were transplanted in adult patients

²As a percentage of all transplants at the alliance (non-heartbeating donors) or centre (live donors) in adult or paediatric patients using kidneys from live or deceased donors

³See Table 4 for numbers of transplants in paediatric and adult patients

Table 3: Patients on the active transplant list

Age of patient (years)	Number of patients on the transplant list (daily average)	Percent change in list size over time period	Number of patients joining the deceased donor transplant list (2003-2005) ¹	Percentage of patients receiving kidney only transplant within:		
				6 months	1 year	2 years
≥18	297	+45	307	19	28	42

¹Exclusions - patients who received live donor transplants (as centre practices with regards to listing of such patients differ) and patients registered for a kidney/pancreas transplant

Table 4: Transplants

Age of patient at transplant (years)	Number of transplants carried out (annual average)	Number of kidney only transplants from: (annual average)			Number of multi-organ transplants that include a kidney (annual average)
		Deceased donors		Live donors	
		Heartbeating	Non-heartbeating		
≥18	84	40	10	34	0

St George's Hospital, London
Survival rates

Table 5: Survival rates for adult (age \geq 18 years) transplant patients¹
(Note: Only the risk-adjusted rates for a centre can be validly compared with the 'All centres' rates)

	This centre					All centres		
	Number of transplants	Unadjusted		Risk-adjusted		Number of transplants	Survival estimate (%)	95% CI
		Survival estimate (%)	95% CI	Survival estimate (%)	95% CI			
First deceased donor transplants								
1 year survival Graft	245	93	(89, 95)	93	(81, 100)	4987	92	(92, 93)
Patient	245	98	(95, 99)	98	(86, 100)	4987	96	(95, 97)
5 year survival Graft	261	86	(81, 90)	88	(77, 100)	5047	82	(81, 83)
Patient	261	87	(83, 91)	89	(78, 100)	5047	87	(86, 88)
Live donor transplants								
1 year survival Graft	108	95	(89, 98)	95	(78, 100)	2242	96	(95, 96)
Patient ²	101	99	(93, 100)	99	(80, 100)	1955	98	(98, 99)
5 year survival Graft	82	85	(75, 92)	85	(66, 100)	1409	88	(87, 90)
Patient ²	74	93	(84, 97)	93	(72, 100)	1232	95	(94, 96)

¹ Cohorts for survival rate estimation:
1 year survival: 1 Jan 2002 - 31 Dec 2006
5 year survival: 1 Jan 1998 - 31 Dec 2002

² First grafts only - re-grafts excluded for patient survival estimation
