Overview of activity, 2005 - 2007

Table 1: Overview of activity

Age of patient (years)	Number of patients on transplant list (daily average)	Percentage ¹ of patients ² receiving kidney only transplant within 1 year of listing	Number of transplants carried out (annual average)					Number of kidneys ³ retrieved by unit (annual average)
			All transplants	Kidney only transplants from			Multi-organ transplants that include a kidney}	
				Heartbeating donors	Non-heartbeating donors	Live donors

¹ As a percentage of the number of patients newly listed on the deceased donor transplant list between 2003 and 2005

² Exclusions - patients who received live donor transplants (as centre practices with regards to listing of such patients differ) and patients registered for kidney/pancreas transplant

³ Kidneys donated by adult or paediatric deceased or live donors

Table 2: Donors

Deceased donors (annual average)			Live donors (annual average)	
Heartbeating	Non-heartbeating		Number	% of transplants in which kidneys from live donors were used ^{2,3}
Number	Number	% of transplants in which kidneys from non-heartbeating donors were used ^{1,2}		
40	0	0	18	25

¹All non-heartbeating donor kidneys were transplanted in adult patients

²As a percentage of all transplants at the centre in adult or paediatric patients using kidneys from live or deceased donors

³See Table 4 for numbers of transplants in paediatric and adult patients

Table 3: Patients on the active transplant list
